

PROJECT VERIFICATION & OUTPUT DOCUMENTATION

Campus Event & Workshop Management System

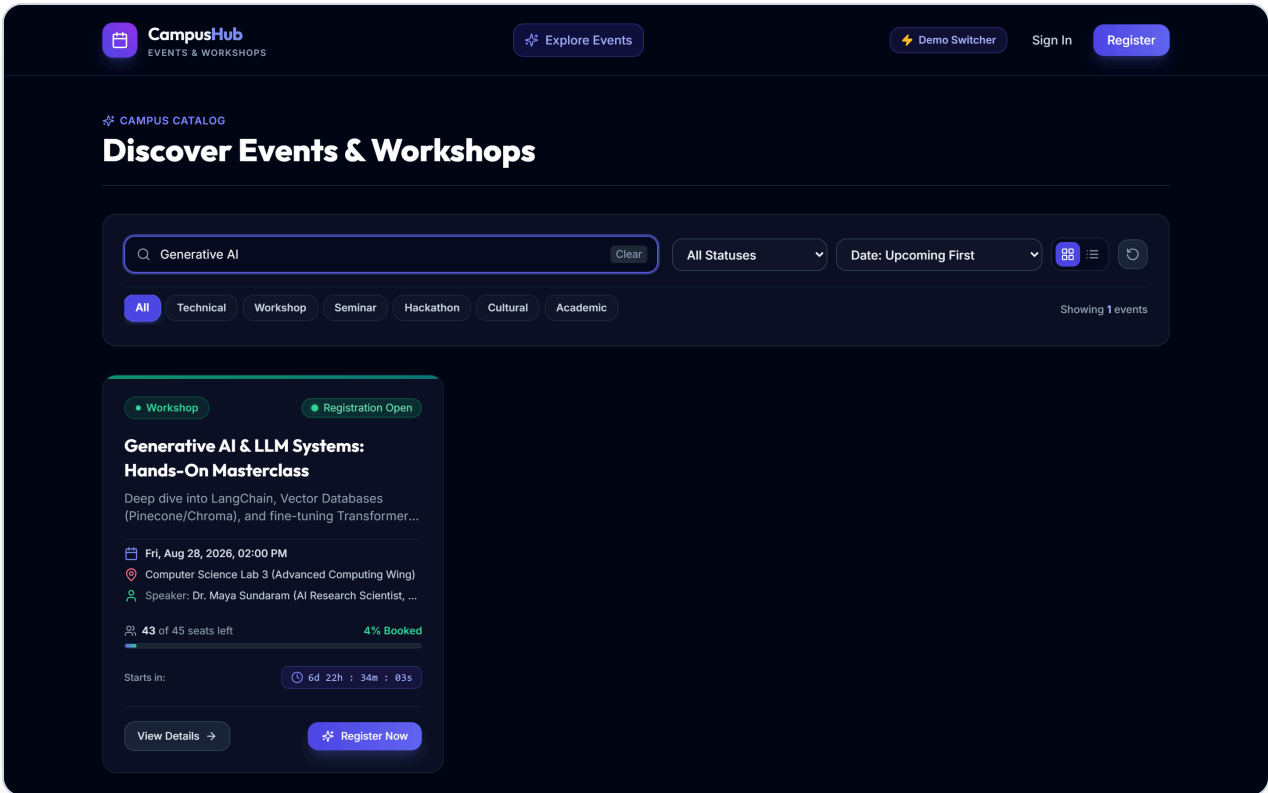

Comprehensive execution output documentation showing CRUD operations, real-time Search, multi-criteria Filtering, Sorting, and Admin Analytics.

STUDENT ROLL NUMBER	TECHNOLOGY STACK	KEY MODULES VERIFIED	EXECUTION STATUS
2647258	MERN + Tailwind CSS	CRUD • Search • Sort • Filter	✓ 100% Operational

Feature 01: Search Real-Time Event Search Query

API: GET /api/events?search=Generative+AI

Dynamic instantaneous search across event titles, speaker names, descriptions, and campus venues. As the query "Generative AI" is typed, the catalog filters in real-time without full-page reloads.

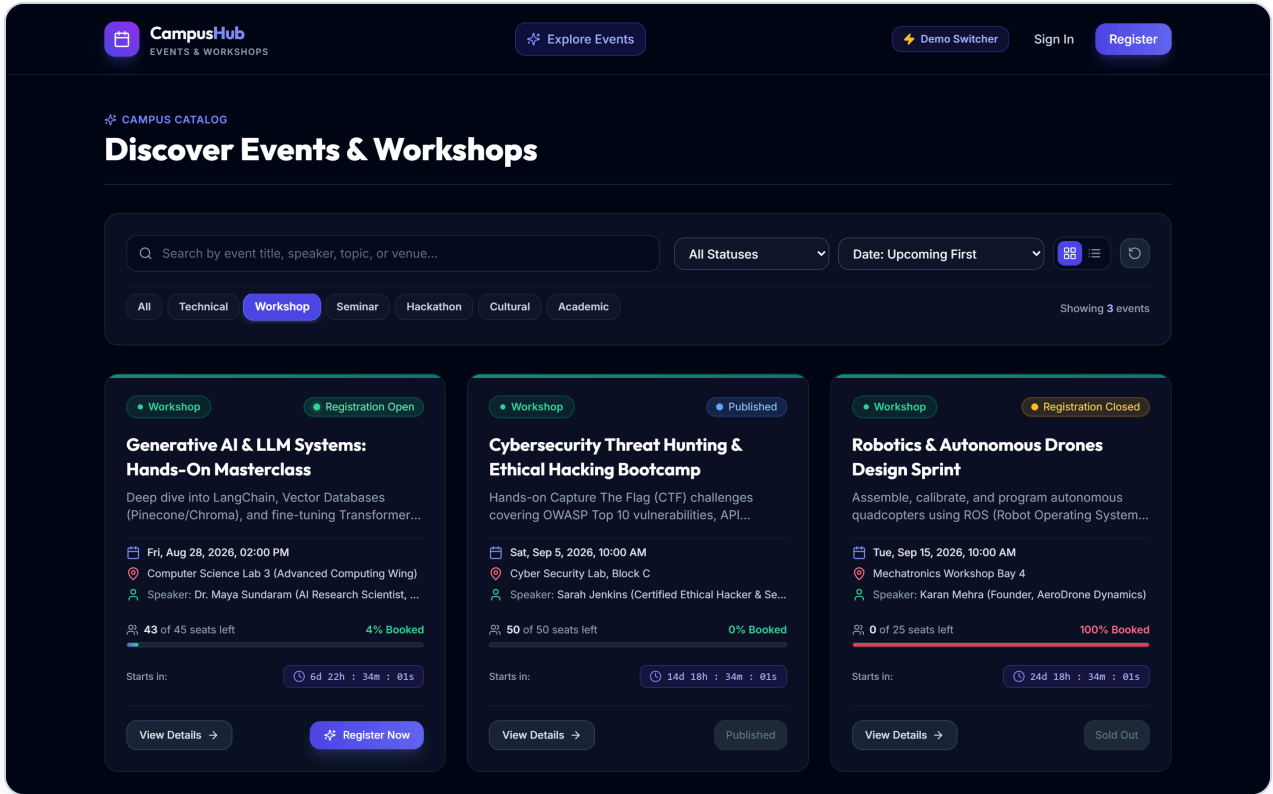

Feature 02:
Filter

Track & Category Filtering (Technical, Workshop, Hackathon, Cultural)

API: GET /api/events?
type=Workshop

Multi-track filtering pills allowing attendees to isolate hands-on workshops, hackathons, seminars, or cultural fests, combined with status dropdown filters (Registration Open / Closed).

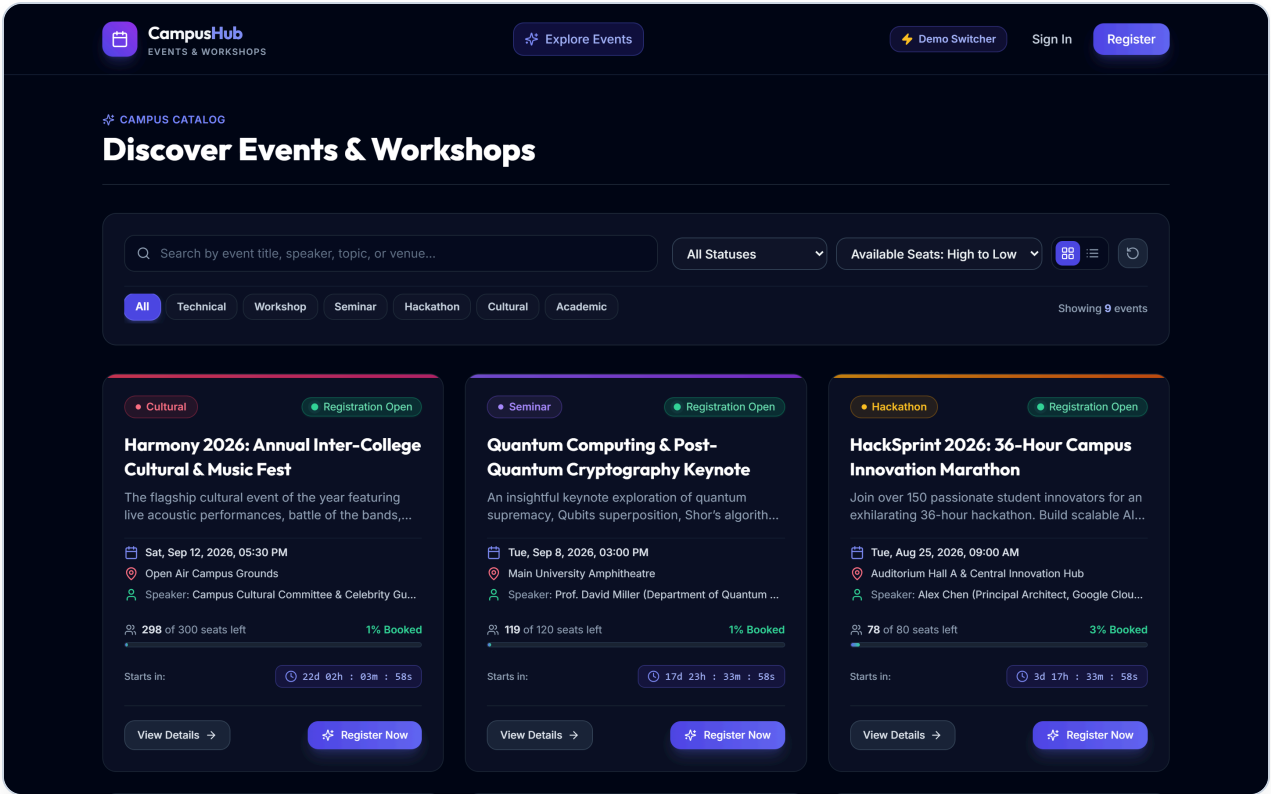

Feature 03:
Sort

Dynamic Sorting by Available Seats, Event Date, or Title

API: GET /api/events?sort=seats

Multi-criteria sorting selector reordering events by nearest date, latest scheduled, seat availability (high-to-low capacity), or alphabetical titles.

CRUD: Create

Admin Event Creation Form, Validation & Live Preview

API: POST /api/events

Controlled form with client & server-side validations (min character lengths, future date constraints, capacity limits) and a live side-by-side card preview updating in real-time.

Edit

🔔

Quick Admin Tips:

• Set status to **Registration Open** to allow student signups.

• Capacity will be tracked atomically; sold-out events close automatically.

• You can view and export registered attendee lists anytime from the dashboard.

Hands-on Workshops

CRUD: Read

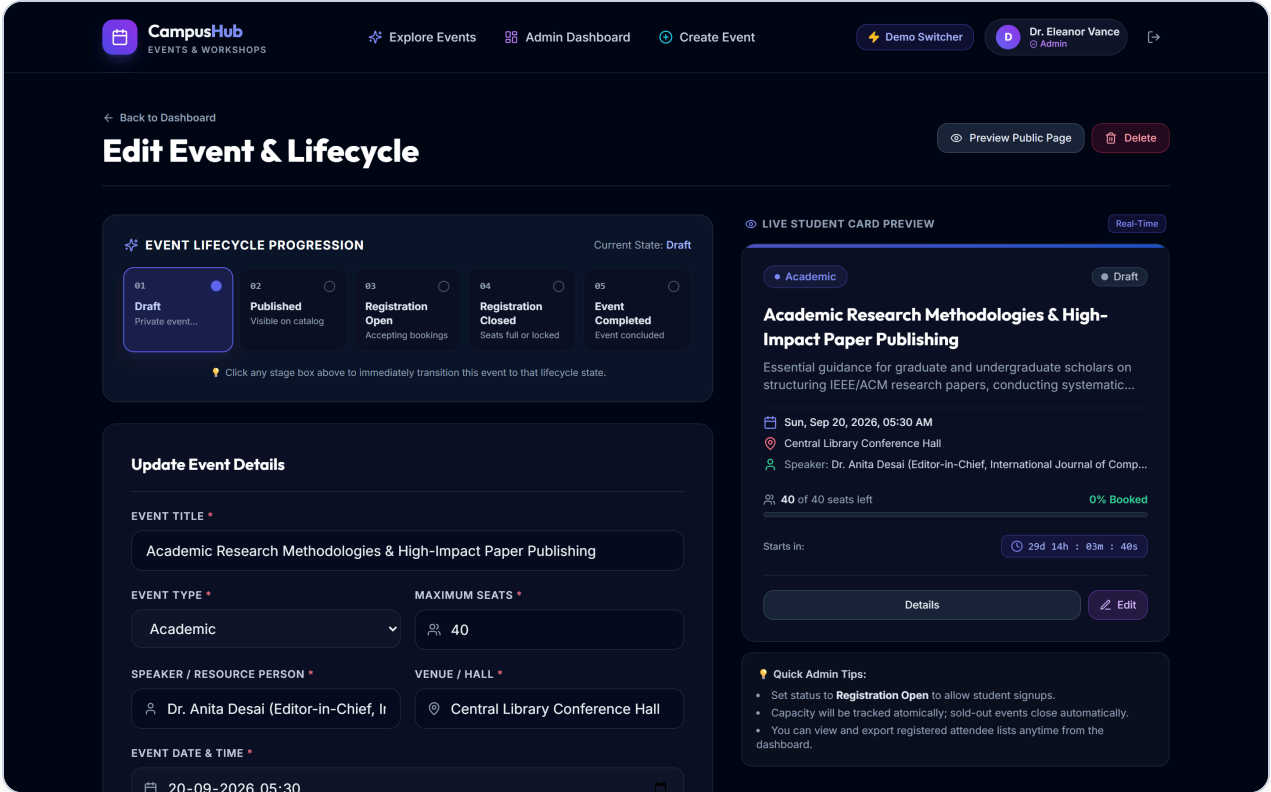

Single Event Overview, Keynote Bio & Live Countdown

API: GET /api/events/:id

Rich single event view displaying live countdown ticker (Days, Hours, Mins, Secs), speaker spotlight, capacity progress bar, and 1-click registration.

Event editor with interactive visual Event Lifecycle Stepper (Draft → Published → Registration Open → Registration Closed → Event Completed) allowing admins to transition event states with 1 click.

CRUD: Delete & Table

Admin Event Management Table & Attendee Roster Roster

API: DELETE /api/events/:id

Event management table with search, quick lifecycle dropdowns, attendee roster modal with CSV export, and cascade event deletion.

Registration Pass

Student Digital Tickets, QR Mockup & Atomic Cancellation

API: POST /api/registrations/:id | DELETE /api/registrations/:id

Student pass dashboard featuring digital tickets with unique Pass IDs, QR codes, iCal sync, and 1-click cancellation that atomically increments available seats back into the pool.

Admin Analytics

Real-Time KPI Cards, Capacity Distribution & Live Stream

API: GET /api/events/stats

Central administration dashboard with 4 metric cards (Total Events, Active Registrations, Total Seats, Occupancy Rate), category capacity chart, status breakdown, and recent registration activity feed.
